

# SterileFLAT®

Antibacterial Medical Keyboards & Mice

## Prevent Cross Infections by upgrading to the SterileFLAT Bluetooth Antibacterial Medical Keyboard

SterileFLAT Keyboards are an invaluable tool in reducing the risk of cross infection in any medical environment. Shared keyboards on the wards or other clinical environments can become breeding grounds for Healthcare associated infections (HAI). Infections that are acquired in hospitals or as a result of healthcare interventions.

SterileFlat Keyboards offer a conventional style keyboard with RoHS Compliancy and Nano Silver impregnated antibacterial silicone latex free membrane barrier which can be used in all areas of clinical and medical environments.

They can be regularly washed with a recognised antibacterial or alcohol based cleaning agent every day, thus reducing the spread of MRSA, C. dif, Norovirus, E. coli, Salmonella and Airborne Viruses. Find out more at [www.sterileflat.com](http://www.sterileflat.com)

### Key features/benefits of the SterileFLAT Keyboard:

- Conventional style keyboard with very low-profile keys with angled edges and wide caps to aid effective cleaning
- Can be cleaned with Antibacterial and Alcohol based agents or Chlor-clean a chlorine based agent as used in many Hospitals
